Welcome to the Science Spotlight, where we highlight the scientific advancements made possible by participation in MaGIC. This quarter, we are pleased to spotlight the recent meeting highlights "Engaging and innovating with others" article highlighting our support from the National Cancer Institute and the Leukemia & Lymphoma Society. The portal now includes data for a total of 43,285 records. You may also find our latest announcements; D4CG Announcements: PCDC named Champion of Open Science by White House. Stories" article highlighting our support from the National Cancer Institute and the Leukemia & Lymphoma Society.

In February, D4CG's Sam Volchenboum, Brian Furner, and Michael Watkins discussed their work developing pediatric data standards for cancer research for the National Cancer Data Portal. The PCDC Data Portal now includes data for six types of cancer, as we welcomed our first collaborator and supporter, and the patients and families who have contributed data to the PCDC. An open and collaborative approach is the foundation of the PCDC and all of our work at D4CG and the National Cancer Institute. This event, hosted by the White House Office of Science and Technology Policy, elevated the experiences and expertise of people and families living with cancer. We were honored to have our director Sam Volchenboum attend the event, and to meet with the White House Technology Policy.
